

IN THE CLAIMS:

Please amend claim 15 as follows:

15. (Twice Amended) A computer system comprising:
  - a first device transferring data at a first speed;
  - a second device, the second device being a client device; and
  - a speed control layer coupled between the first and second devices, the speed control layer limiting the maximum data transfer speed of a high-bandwidth connection between the speed control layer and the second device so as to transfer data from the first device to the second device over a high-bandwidth connection at a second predetermined speed that is less than the first speed and less than the normal speed of the high-bandwidth connection.
